

Custom Freight Systems, Inc.

Custom Freight Systems, Inc. is a uniquely designed organization. Custom is not a name picked randomly out of the air but rather specifically chosen because each freight need is unique.

We customize our freight service to fit the individual client requirements. Our service is second to none.

No matter when you need your pick-ups or deliveries we are there to serve you.

Custom Freight is owned by three partners and they are all active at each terminal to assure you are getting the service you require.

*Now you have a friend
in the freight business!*

Custom Freight is a California based Logistics provider offering a diversified array of transportation services including Less Than Load and Full Load Service, Warehousing and Distribution. Custom Freight has terminals and state of the art warehousing in Santa Fe Springs (Southern California, Los Angeles area), and San Lorenzo (Northern California, San Francisco area) with its strong system of controls, aided by web based computer software which allows you to access your inventory and tracking services 24/7.

Custom Distribution can service your total warehousing needs, including temporary overflow or permanent storage. When you have no facilities in the marketing area, we can provide first class service to your customers.

Custom Distribution is proud to provide a clean, safe, dry and orderly environment to store and protect our customers products. Utilizing state of the art surveillance cameras, alarms, and other top quality security measures we provide a secure environment for all our customers. Security at our site, translates to peace of mind at yours!
